📍 Palembang City, Indonesia

## SUMMARY

Full Stack Web Developer with experience in designing, developing, and maintaining scalable web applications using Laravel, React, TypeScript, PHP, and MySQL. Skilled in building RESTful APIs, designing relational databases, and developing responsive user interfaces. Experienced in delivering end-to-end software solutions for government and private sector projects while maintaining clean, maintainable code and application performance. Passionate about solving complex problems, learning new technologies, and building reliable software that delivers business value.

## EXPERIENCE

### Freelance Full Stack Developer

Jun 2025 - Jun 2026

Government Client: Dinas Lingkungan Hidup Kota Palembang

- Designed, developed, and maintained multiple web-based information systems using Laravel, React.js, TypeScript, and MySQL to support organizational administration and operational processes.
- Built scalable REST API-based architectures to enable secure and efficient communication between frontend and backend services.
- Designed and implemented relational databases, business logic, authentication, authorization, and role-based access control according to business requirements.
- Developed various application modules including master data management, transaction processing, reporting, monitoring dashboards, and user administration.
- Created responsive and interactive user interfaces using React.js with a strong focus on user experience and application performance.
- Implemented frontend and backend validation mechanism to ensure data integrity, consistency, and security.
- Collaborated with stakeholders to analyze business requirements, design technical solutions, and deliver features aligned with organizational needs.
- Performed testing, debugging, troubleshooting, and ongoing maintenance to ensure application stability and reliability.
- Participated in deployment, monitoring, and continuous improvement processes to enhance overall system efficiency and scalability.
- Collaborated directly with clients to gather requirements, translate business needs into technical solutions, and deliver production-ready applications.

## PROJECTS

### Sistem Informasi Geografis Petugas dan TPS (SIGET)

2025 - 2026

Full Stack Developer

- Developed a GIS-based web application to manage and visualize waste collection points (TPS) and field officer locations using interactive maps.
- Implemented geospatial features including coordinate management, location-based filtering, and CRUD operations for TPS and field officer data.
- Built RESTful APIs and responsive user interfaces using Laravel, React.js, and Leaflet for managing geospatial data and interactive maps.

Tech Stack: Laravel, React.js, TypeScript, MySQL, Leaflet, TanStack Query

Sistem Informasi Kehadiran Pegawai Kebersihan (SIKPK)

2025 - 2025

Full Stack Developer

- Developed an employee attendance management system to streamline attendance recording, monitoring, and reporting processes.
- Designed and implemented authentication, role-based access control, attendance validation, and reporting modules using Laravel.
- Built responsive dashboards with React.js to provide attendance summaries and improve operational monitoring.

Tech Stack: Laravel, React.js, TypeScript, MySQL

Sistem Informasi Retribusi Persampahan (SIREP)

2025 - 2025

Full Stack Developer

- Developed a waste retribution management system to manage taxpayer registration, SKRD generation, billing, payment records, and reporting.
- Built responsive user interfaces using React.js and Inertia.js while implementing business logic, validation, and role-based access control with Laravel.
- Designed relational database schemas and implemented transaction workflows to ensure accurate billing, payment processing, and reporting.

Tech Stack: Laravel, React.js, Inertia.js, MySQL

Konawe Tourism Information System (Capstone Project)

2024 - 2024

Full Stack Developer

- Developed a tourism information system to provide destination information, tourism services, and visitor guidance.
- Built backend services, authentication, and content management features using Laravel and Livewire.
- Designed responsive user interfaces and relational databases to simplify tourism content management.

Tech Stack: Laravel, Livewire, Tailwind CSS, MySQL

EDUCATION

Informatics

Oct 2020 - Aug 2024

Institut Teknologi dan Bisnis Palcomtech

SKILLS

Frontend: React.js, Inertia.js, Tailwind CSS, React Router

Backend: Laravel, NestJS, REST APIs, Drizzle ORM

Database: MySQL, PostgreSQL

State & Data: Zustand, TanStack Query

General Tooling: Git, GitHub, VS Code, Postman

Specialties: REST API Development, Database Design, Authentication & Authorization, Responsive UI Development
